

# Lennio Signatures For Exchange

Central Email Signature Management

## Lennio Signatures For Exchange

Lennio Signatures For Exchange allows you to centrally manage users emails to ensure that your corporate emails contain a professional email signature along with the necessary legal disclaimer and company footer. By making use of Active Directory merge fields you can configure one email signature template that is automatically customized with the sender's information. Since email signatures are configured centrally, it is easy to update signatures with information about events, awards, and company news.

### Lennio Signatures For Exchange

#### DISCLAIM, SIGN AND BRAND YOUR EMAILS

Lennio Signatures For Exchange gives you peace of mind. Each outgoing email is stamped with the necessary legal disclaimer and ensures that your emails display consistent corporate imagery by centrally adding company branded email signatures using your logo and Active Directory merge fields.

## GLOBAL & USER BASED EMAIL SIGNATURES

Lennio Signatures For Exchange allows you to define global signatures added to every email, and user based signatures only added to emails from specified users, groups, domains, or LDAP queries.

## INTERNAL & EXTERNAL EMAIL SIGNATURES

Lennio Signatures For Exchange distinguishes between internally and externally sent mails so different signatures and disclaimers can be added to each.

## FORMATTED SIGNATURES WITH PICTURES & TABLES

Lennio Signatures For Exchange comes with an HTML editor that allows you to include formatting (embedded) images and tables in your signatures.

## ACTIVE DIRECTORY MERGE FIELDS

Automatically customize email signatures by making use of Active Directory merge fields such as name, phone, number and title. Personalized images and links from AD can also be inserted, for instance to add photos, bio links and LinkedIn profiles.

## DISCLAIMERS & SIGNATURE POSITIONING

Lennio Signatures For Exchange can place the signature and disclaimer after the most recently entered message text on replies and forward messages. This avoids all the signatures being added to the bottom of the email.

## ADD DIFFERENT SIGNATURES ON REPLIES

Lennio Signatures For Exchange allows you to add a more extensive signature on your first email, and then a shorter one on each following email.

## AVOIDING MULTIPLE DISCLAIMERS & SIGNATURES

By searching messages for an existing disclaimer or signature, Lennio Signatures For Exchange can avoid adding another footer when replying.

## CONDITION BASED DISCLAIMERS

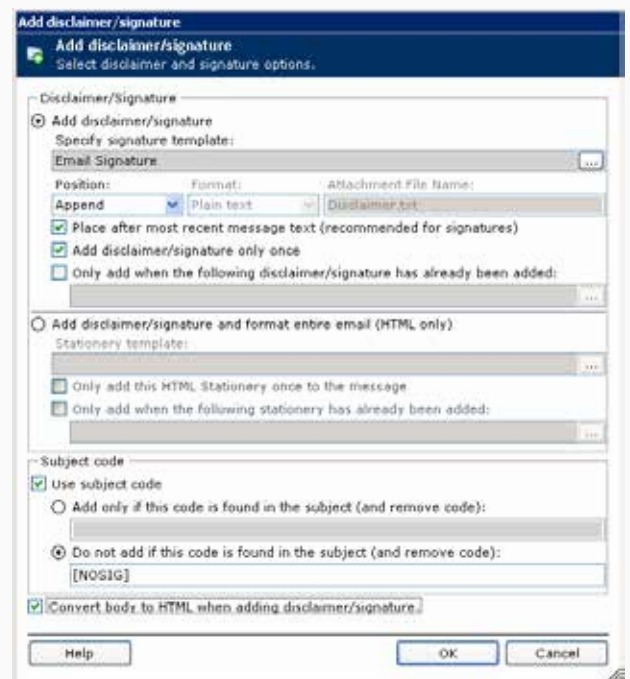

Disclaimers can be added or suppressed depending on certain conditions such as word in the subject or body, or a particular sender or recipient.

## SEE DISCLAIMERS AND SIGNATURES IN SENT ITEMS

Lennio Signatures For Exchange can automatically update a user's set terms in Outlook to show the disclaimer and signature that was added.

## SUPPORT FOR ALL EMAIL CLIENTS & MOBILE DEVICES

Lennio Signatures For Exchange can add footers to emails sent from any email client including mobile devices such as iPhone, iPad, and Blackberry
