LepideAuditor for SQL Server

Lepide

LepideAuditor for SQL Server provides a simple means of seeing who made changes to your SQL servers, when they were made and automatically sends you real time alerts and detailed reports when needed. It also helps you to keep track of the overall health of your SQL Servers. This solution is available either standalone or as a part of our award winning LepideAuditor Suite.

SQL Server

Intuitive Dashboard

- ✓ Quickly spot activity trends using our SQL Server trend dashboard
- ✓ Instantly see a summary of changes made per administrator, source and trend to help you identify change / event anomalies
- ✓ Easily organise changes by criticality or source

Real Time Alerting

- ✓ Easily create alerts when specified events occur
- ✓ Quickly identify anomalies with threshold alerts
- ✓ Instantly receive real time alert straight to the app, console or a specific email address

In Depth Reporting

- ✓ Completely control auditing of login changes, top users, active databases, objects, tables, replication, roles, jobs and more
- ✓ Simplify auditing with one log per change showing who, what, when and from where changes are made, as well as before and after values
- ✓ 50+ pre-defined reports for systems management and compliance

Mobile App

- ✓ Instantly see changes as they happen with our LiveFeed
- ✓ Designed to work on any Apple or Android enabled device

Powerful Searches

- ✓ Simplify complex searches with our logical and intuitive interface
- ✓ Instantly find what you need with custom searches and filters
